

**Intel New Mexico
Community Environmental Working Group
November 2005 EHS Activity Report**

PLANT STATUS:

Production equipment servicing Fab 11 West, Fab 11 South, and Fab 11x was operating at approximately 99% of capacity, as currently configured during Q3'05.

MONITORING UNDERWAY OR COMPLETED THIS MONTH:

- Quarterly thermal oxidizer testing began on the Fab 11x Bridge thermal oxidizer and the Fab 11S thermal oxidizer and will be concluded November 18th. The Fab 11W thermal oxidizer and Fab 11x Fab thermal oxidizer will conclude the testing program and will be tested in December 2005.

INSPECTIONS/MEETINGS:

No inspections or meetings for past month.

SITE EVENTS:

Date:	Event:	Status/Community Impact:
July 18 – November 11	Crane on Westside of Fab 11X	Welding on steel beams that may result in odors.
July 19 – November	East Slope landscaping	Worker, construction vehicles, earthwork equipment.
October - November	Roof Membrane Install/repair	Use of Solvent and Adhesive – Could produce Solvent/Chemical odors off site
October 30	Fab 11X Fab Thermal Oxidizer – unscheduled downtime	Factory tools shutdown resulting in temperature fluctuations in thermal oxidizer Below 1350°F permit limit (unit down to 1348°F) for 3.2 hours No untreated emissions expected since most tools not operating and very small temperature drop
November 1 – November	Fab 11W Thermal Oxidizer – scheduled downtime	Preventative maintenance and project work Unit down for 84 hours Untreated solvent emissions during downtime
November 14	Crane near Fab 11W	Support equipment removal

INFORMATION REQUESTED BY OR PROVIDED TO REGULATORY AGENCIES:

Item:

Excess Emission Form (801 report) for Fab 11S RTO scheduled downtime
Excess Emission Form (801 report) for Fab 11X Fab RTO unscheduled downtime
Excess Emission Form (801 report) for Fab 11W RTO scheduled downtime
Quarterly Wastewater Flow Report
Fab 11X Bridge scrubber start-up notice
Quarterly Air Emissions Report
