

Community Environmental Working Group

- Update -

Assessing cancer burden in the area of the Intel manufacturing plant

September 21, 2022

Breakthroughs!

- Obtained updated population estimates for study area
 - July 2022: Received tract-level census data from NM Department of Health
 - September 2022: Received tract-level census data from the National Cancer Institute
- Assigning geo-codes to cases diagnosed during the period 2000-2005
 - Information Management Systems, Incorporated (IMS) – under contract to the National Cancer Institute – will modify our database management system to provide the broader geo-coding services that we need to include 2000-2005 records in the updated assessment
 - This semester, the New Mexico Tumor Registry will host a graduate student who will provide geocoding services that will assist in including 2000-2005 records in the updated assessment
