

ACTION-ITEM PROGRESS REPORT

Community Environmental Working Group

“Striving for Continuous Environmental Improvements at Intel”

Pending Action Items (includes items assigned at the previous meeting)
(numbering system refers to date initiated/number of Action Item for that meeting)

TASK	WHO	STATUS
2024-05-08/2 Frank Gallegos will provide the name of the monitoring equipment used by Intel when monitoring odors.	Frank Gallegos	Item complete 12.18.2024 Intel’s primary means of testing our Air Emissions is utilizing FTIR’s at the outlet of the stack for each emissions source. Our 24/7 emergency First Responders utilize Honeywell Microclip XL 4 gas monitors when there is a community odor complaint as they walk the fence line to try and determine if the odor is coming from Intel. They also pull data from our onsite Meteorological Weather Station to determine direction of where the wind is blowing. They also verify that all air treatment systems are operating.
2024-05-08/3 Frank Gallegos will work with the CEWG to re-evaluate the protocols and procedures to odor complaint responses.	Frank Gallegos	Item pending
